

DCIT 208: SOFTWARE ENGINEERING PROJECT

Deliverable 0: Team Charter and Project Setup

Team Name: LUXBYNESS

Project Title: Modern Salon Management and Booking Website

Tagline: “Creating a modern, user-friendly website that simplifies salon booking and enhances customer experience.”

1. Project Overview

LUXBYNESS is developing a modern web platform for salon management and appointment booking. The system will allow customers to view services, browse salon work, obtain business information, and schedule appointments online. The primary goal is to drastically improve the customer experience while reducing manual administrative workload.

Client Information

- **Client Name:** Ms. Vanessa
- **Organization:** LUXEYNESS
- **Contact Person:** Ms. Vanessa
- **Problem Statement:** The salon currently relies heavily on WhatsApp for booking appointments and responding to inquiries. This decentralized manual process results in missed inquiries, delayed responses, and occasional double bookings. The client requires a centralized website that enables automated appointment scheduling, professional service presentation, and enhanced online visibility.

2. Team Members & Roles

Full Name	Student ID	Email	Phone	GitHub	Project Role
Owusu-Ansah John Nana Kwaku Bonsu	22409852	jnkbowusu-ansah@st.ug.edu.gh	0209150445	John-owusu-ansah	DevOps / Release Lead
Sawyer Prince Elnathan Akilakpa	22270484	peasawyer@st.ug.edu.gh	050570828	elnathan-ghub	UX / Research Lead
Antwi Gladys Anobea	22376230	gaantwi028@st.ug.edu.gh	0245666733	anobea	Project Manager
Asiedu Elvis	11174994	easiedu120@st.ug.edu.gh	0544890635	asideuelvis	Implementation Lead

Full Name	Student ID	Email	Phone	GitHub	Project Role
Sampson Menum Landokidow	22300655	smlandokidow@st.ug.edu.gh	0544668279	SAMPSON8279	Architecture & Context Lead
Kotey Hammond Amon	22303916	hakotey001@st.ug.edu.gh	0557324318	HammondAmon	QA / Validation Lead
Abdul-Manan Abu Naeem	22264334	abunaeem1550@gmail.com	0531511004	abunaeem1550	Documentation Lead

3. Team Operating Rules

- **Communication Platform:** WhatsApp
- **Meeting Schedule:** Tuesdays at 10:00 AM and Fridays at 9:30 AM
- **Expected Response Time:** Within 12 hours

Conflict Resolution

Disputes will first be resolved internally through open discussion. Unresolved matters will be formally escalated to the Project Manager. Final decisions will be made by a majority agreement among all team members.

4. Member Biographies

- **John Owusu-Ansah:** I am a Level 200 Information Technology student with a deep passion for computing systems and software architecture. Intrigued by the inner workings of technology, I focus on understanding how complex software functions, interacts with hardware, and solves real-world problems. Driven by curiosity, I am building the foundational skills necessary to innovate in the digital landscape.
- **Sawyer Prince Elnathan Akilakpa:** A 19-year-old Level 200 student pursuing a Bachelor of Science in Information Technology at the University of Ghana. I am passionate about technology and aspire to become a Cloud Architect, leveraging innovation to solve real-world problems. My strengths include effective communication and web development, which enable me to collaborate and create impactful digital solutions. In my free time, I enjoy watching movies, playing games, and expanding my knowledge through study. I was honored as the Overall Best Student in General Arts with Mathematics at Presbyterian Boys' Secondary School. I am also known for being proactive and taking initiative when opportunities and challenges arise.
- **Antwi Gladys Anobea:** A Level 200 Computer Science student with an interest in software development and data analysis. I enjoy learning new programming skills and working on group projects that improve my technical abilities. I have basic knowledge of Python, Java, and web development. I am hardworking, cooperative, and eager to gain practical experience in the technology industry. In my free time, I enjoy reading and exploring new technological trends.
- **Asiedu Elvis:** A level 200 student offering Bachelor of science information technology in the university of Ghana. Growing up I developed a fascination for computers and how they work. My main hobbies are music and football, and I also get motivated by science fiction movies. My primary strength lies in web development, and currently working toward a career as a full-stack developer, building both the visible and behind-the-scenes layers of digital products. My academic journey reflects a commitment to mastering the technical foundations that underpin modern software systems. I am at my most productive when I'm surrounded by motivated peers in

a healthy collaborative environment, contributing ideas readily, taking ownership of my responsibilities, and pushing projects forward with focus and reliability. I believe that a healthy team dynamic brings out the best in my work and I'm committed to being the kind of collaborator others can depend on.

- **Sampson Menum Landokidow:** An Information Technology student in his second year, actively building his skills in full-stack development with a focus on Java. I enjoy learning how to connect frontend design with backend logic to create functional web applications. I am a natural team player, I thrive in collaborative settings where I can contribute to group projects, solve practical problems, and learn alongside others. I am driven by a passion for technology and dedicated to continuously expanding my engineering toolkit to build efficient, user-friendly digital solutions.
- **Hammond Kotey Amon:** A Level 200 student of Mathematical Sciences Majoring in Computer Science. I have always had the passion to solve problems, whether big or small. As a result, I decided to partake in the revolution and transition of our world into a digital one, with the aim of implementing my problem-solving ability to find effective solutions. I am more than happy to collaborate with bright and positive minds and learn along the way in this tech-driven world.
- **Abdul-Manan Abu Naeem:** A Level 200 student pursuing Bachelor of computer science. I have interest in software development, database management and cybersecurity. I am passionate about learning new technologies and applying technical skills to solve real world problems. I do my best in teams and enjoy collaborative projects and also continuously seeks opportunities to improve the knowledge in the field of computing. My goal is to build innovative technology solutions that contribute positively to society.

5. Repository Setup & Issues

Repository URL: <https://github.com/John-owusu-ansah/DCIT-208-Group-29>

Initial GitHub Issues

- Repository Structure Setup
- Team Charter Preparation
- Client Requirements Gathering
- Website Requirements Analysis
- AI Usage Policy Documentation
- Appointment Booking Feature Research
- Salon Portfolio Feature Research
- D0 Submission Preparation

6. Risk Management & Policies

Fallback Client Plan

If Ms. Vanessa becomes unavailable or unresponsive, the team will proactively approach another local beauty and wellness business within one week. Where appropriate, the team will reuse the pre-established appointment booking requirements to minimize project delays.

AI Usage Contract

- **Permitted Use:** The team may utilize AI tools for brainstorming, documentation assistance, project planning, and code explanation.
- **Human Oversight:** All AI-generated content must be thoroughly reviewed, validated, and approved by team members prior to submission.
- **Accountability:** Responsibility for the integrity and accuracy of all submitted work remains entirely with the team.

7. Evidence Statement

The following screenshots document initial client alignment and requirements gathering interactions with Ms. Vanessa via WhatsApp:

Good morning

10:15 AM ✓✓

Gladys here

10:15 AM ✓✓

Okayyy

11:07 AM

Yes please

11:25 AM ✓✓

My team and I figured you do not own a website and since we're working on a project entailing that we would like to create a website for your business and it's absolutely free

11:30 AM ✓✓

we hope you accept our proposal

11:31 AM ✓✓

You

My team and I figured you do not own a website and since we're working on a project entailing that we would like to...

Ooh wooww

**You**

We would also like to know your expectations

Concerning the website?

11:53 PM

Today

Yes please 4:33 AM ✓✓

Ooh Gladys, we're excited about the opportunity and appreciate the offer. For the website, we'd like it to showcase our braiding services, display photos of our work, include our contact details and location, and make it easy for customers to reach us or book appointments.

We'd also love a clean and modern design that reflects our brand.

You

I'll also like to know what problem you need solved

The main challenge we'd like the website to solve is making it easier for customers to find us and book our services without having to go back and forth on WhatsApp. We sometimes experience double bookings, missed inquiries, and delays in responding to clients. We'd love a system that helps manage appointments, showcases our work professionally, and gives customers all the information they need in one place.
